INDEPENDENT AUDITOR'S REPORT

To the City Council Burton, Texas

Opinions

We have audited the accompanying financial statements of the governmental activities, the business-type activities, and each major fund of the City of Burton, Texas as of and for the year ended March 31, 2022, and the related notes to the financial statements, which collectively comprise the City's basic financial statements as listed in the table of contents.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, and each major fund of the City of Burton, Texas, as of March 31, 2022, and the respective changes in financial position and, where applicable, cash flows thereof for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Basis for Opinions

We conducted our audit in accordance with auditing standards generally accepted in the United States of America Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the City of Burton, Texas, and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audit. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

Responsibilities of Management for the Financial Statements

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the City's ability to continue as a going concern for twelve months beyond the financial statement date, including any currently known information that may raise substantial doubt shortly thereafter.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinions. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with generally accepted auditing standards will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with generally accepted auditing standards, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
 error, and design and perform audit procedures responsive to those risks. Such procedures include
 examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the City's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that
 raise substantial doubt about the City's ability to continue as a going concern for a reasonable period of
 time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Required Supplementary Information

Accounting principles generally accepted in the United States of America require that the management's discussion and analysis and budgetary comparison information be presented to supplement the basic financial statements. Such information is the responsibility of management and, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

MANAGEMENT'S DISCUSSION AND ANALYSIS

Our discussion and analysis of the City of Burton's ("City") financial performance provides an overview of the City's financial activities for the fiscal year ended March 31, 2022. Please read it in conjunction with the City's financial statements, which begin on page 8.

FINANCIAL HIGHLIGHTS

- The City's net position increased by \$207,351 as a result of this year's operations.
- The General fund balance at year-end was \$219,098.
- The Debt Service fund balance at year-end was \$125,491.
- The Waste and Sewer Fund net position was \$865,386, including current and capital assets.

USING THIS ANNUAL REPORT

This annual report consists of a series of financial statements. The Statement of Net Position and the Statement of Activities provide information about the activities of the City as a whole and present a longer-term view of the City's finances. Fund financial statements start on page 10. Fund financial statements also report the City's operations in more detail than the government-wide statements by providing information about the City's two funds.

Reporting the City as a Whole

Our analysis of the City as a whole begins on page 8. One of the most important questions asked about the City's finances is, "Is the City as a whole better off or worse off as a result of the year's activities?" The Statement of Net Position and the Statement of Activities report information about the City as a whole and about its activities in a way that helps answer this question. These statements include all assets and liabilities using the accrual basis of accounting, which is similar to the accounting used by most private-sector companies. All of the current year's revenues and expenses are taken into account regardless of when cash is received or paid.

These two statements report the City's net position and changes in them. You can think of the City's net position – the difference between assets and liabilities – as one way to measure the City's financial health, or financial position. Over time, increases or decreases in the City's net position are one indicator of whether its financial health is improving or deteriorating.

In the Statement of Net Position and the Statement of Activities, we report the activities of the City as follows:

- Governmental activities The City's basic services are reported here. Property, sales, and other taxes along with court fines and fees finance most of these activities.
- Business-type activities The City charges a fee to customers to help cover all or most of the cost of services it provides for water, wastewater, and garbage services.

Reporting the City's Most Significant Funds

Our analysis of the City's major funds begins on page 10 and provides detailed information about the most significant funds – not the City as a whole.

- Governmental funds Most of the City's basic services are reported in governmental funds, which focus on how money flows into and out of those funds and the balances left at year-end that are available for spending. These funds are reported using an accounting method called modified accrual accounting, which measures cash and all other financial assets that can be readily converted to cash. The governmental fund statements provide a detailed short-term view of the City's general government operations and the basic services it provides. Governmental fund information helps you determine whether there are more or fewer financial resources that can be spent in the near future to finance the City's programs. We describe the relationship (or differences) between governmental activities (reported in the Statement of Net Position and the Statement of Activities) and governmental funds in reconciliation at the bottom of the fund financial statements.
- Proprietary funds The City reports the activities for which it charges users in proprietary funds using the same accounting methods employed in the Statement of Net Position and the Statement of Activities.
- Notes to the financial statements the notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

The City as a Whole

The City's net position increased by \$207,351. Our analysis below focuses on the net position (Table 1) and changes in net position (Table 2) of the City's activities.

THE CITY'S FUNDS

As the City completed the year on March 31, 2022, its governmental funds (as presented in the balance sheet on page 10) reported a combined fund balance of \$344,589. This is an increase of \$79,204.

General Fund Budgetary Highlights

The City's Council annually adopts an operating budget. There were no budget amendments made during the current year. In summary for the General Fund, actual revenues exceeded total budgeted revenues by \$23,874, and actual expenditures and other financing sources and uses were less than budgeted by \$17,308. In summary for the Water and Sewer Fund, total budgeted revenues were less than actual revenues by \$67,611, and actual expenditures exceeded budgeted expenditures by \$17,442.

CAPITAL ASSET AND DEBT ADMINISTRATION

Capital Assets

As of March 31, 2022, the City had \$853,980 invested in capital assets. (See Table 3 below.)

CURRENTLY KNOWN FACTS, DECISIONS, OR CONDITIONS

In March of 2021, the City entered into an Inter-local Agreement with the Washington County Sheriff's Department to provide law enforcement within the City. Since its approval and implementation, Burton has seen a distinct increase in law enforcement presence which has resulted in more security for our residents. The cost of this agreement is a great reduction in expenses that would have been incurred by having a city police department. These savings also provide funds for badly needed street repairs and improvements.

The development of the Laas-Weeren City Park has been a beautiful addition to our little town. The improvements at the park have been widely appreciated and citizens are encouraged to enjoy it.

Looking into the future, the City Council plans to meet with representatives of Burton ISD to better understand whether the approved bond issue for school expansion plans will require more service from our utilities system than the current school has in the past. The Council will plan accordingly for future expansion, if required.

The City's has an anticipated 2022 tax rate of \$0.32131 per \$100 valuation; which is divided to be a Maintenance and Operations tax of \$0.073738 and an Interests and Sinking tax, which funds the \$361,000 Bond Debt Service, of \$0.247572. This tax rate for 2022 is a "no-new-revenue" tax rate.

CONTACTING THE CITY'S FINANCIAL MANAGEMENT

This financial report is designed to provide the City's citizens, taxpayers, customers, and creditors with a general overview of the City's finances and to show the City's accountability for the money it receives. If you have questions about this report or need additional financial information, contact City Secretary, P.O. Box 255 Burton, Texas 77835.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Reporting Entity

The City of Burton ("City") is a municipality under the provision of the State of Texas. The City operates as a Council government. All powers of the City are vested in the Mayor and elective Council members. This body enacts local legislation, adopts budgets, and determines policies. The City provides the following services to its citizens: public safety, street maintenance, solid waste collection and disposal, municipal court, community development, public improvements, water and sewer services, and general administrative services.

For financial reporting purposes, in conformance with generally accepted accounting principles, the City's financial statements include all funds and other organizations over which the Council is financially accountable. In addition, component units which may be included are organizations for which the nature and the significance of their operational or financial relationship with the City is such that exclusion would cause the City's financial statements to be misleading or incomplete. The City has no component units based on the foregoing criteria.

B. Basis of Presentation

Government-wide financial statements

The government-wide financial statements (i.e., the statement of net position and the statement of activities) report information on all activities of the City. The effect of interfund activity has been eliminated. Governmental activities, which normally are supported by taxes, assessments, and intergovernmental revenues, are reported separately from business-type activities, which primarily rely on fees and charges for support.

The government-wide statements are prepared using the economic resources measurement focus and the accrual basis of accounting. This is the same approach used in the preparation of the proprietary fund financial statements but differs from the manner in which governmental fund financial statements are prepared. Therefore, governmental fund financial statements include reconciliation with brief explanations to better identify the relationship between the government-wide statements and the statements for governmental funds.

The government-wide Statement of Activities presents a comparison between expenses, both direct and indirect, and program revenues for each segment of the business-type activities of the City and for each governmental program. Direct expenses are those that are specifically associated with a service, program or department and are therefore clearly identifiable to a particular function. Program revenues include charges paid by the recipients of the goods or services offered by the programs, grants, and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues not classified as program revenues are presented as general revenues. The comparison of program revenues and expenses identifies the extent to which each program or business segment is self-financing or draws from the general revenues of the City.

Fund financial statements

Fund financial statements report detailed information about the City's funds. Each fund is accounted for by providing a separate set of self-balancing accounts that comprises its assets, liabilities, fund equity, revenues, and expenditures/expenses. The emphasis in fund financial statements is on the major funds in

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

either the governmental or proprietary categories. A fund is considered major if it is the primary operating fund of the City or meets the following criteria:

- a. Total assets, liabilities, revenues, or expenditures/expenses of that individual governmental fund are at least 10 percent of the corresponding total for all funds of that category or type; and
- b. Total assets, liabilities, revenues, or expenditures/expenses of the individual governmental fund are at least 5 percent of the corresponding total for all governmental funds combined.

Since the City maintains only a few funds, all are considered major and reported in separate columns in the fund financial statements. These governmental funds are described below:

The City reports the following major governmental funds:

<u>General Fund</u> – The General fund is the general operating fund of the City. It is used to account for all financial resources except those required to be accounted for in another fund.

<u>Debt Service Fund</u> – The Debt Service Fund is used to account for the accumulation of financial resources for the payment of principal, interest and related costs on long term debt paid primarily from property taxes.

The following major proprietary funds are presented:

<u>Water and Sewer Fund</u> – The Water and Sewer Fund is used to account for water and wastewater services. Activities of the fund include administration, operations and maintenance of the water and wastewater system, billing, and collection activities.

All governmental funds are accounted for using modified accrual basis of accounting and the current financial resources measurement focus. Under this basis, revenues are recognized in the accounting period in which they become measurable and available. The City considers revenue as available if it is collected within 60 days after year end. Expenditures are recognized in the accounting period in which the fund liability is incurred, if measurable.

The City reports the systems fund as a proprietary fund. The City applies all Governmental Accounting Standards Board (GASB) pronouncements. GASB Statement No. 20 *Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that use Proprietary Fund Accounting*, offers the option of following all Financial Accounting Standards Board (FASB) standards issued after November 30, 1989, unless the latter conflict with or contradict GASB pronouncements, or not following FASB standards issued after such date. The City has elected the option to not follow FASB standards after November 30, 1989.

Proprietary funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary funds' principal ongoing operations. Operating expenses for the proprietary funds include the cost of personal and contractual services, supplies and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as non-operating revenues and expenses.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

C. Revenue Recognition and Receivables

All water and wastewater revenues are recognized on the accrual basis when the related services are provided and the earning process is complete. Services are provided to customers under a rate structure designed to produce revenue sufficient for operating and maintenance costs.

All receivables are reported at their gross value and are reduced when a portion is expected to be uncollectible.

D. Budgets

An annual fiscal budget is prepared for all income and expense general ledger accounts. A draft of the budget is populated with the actual income and expense totals incurred in the previous fiscal year by month. The draft is reviewed, and all previous fiscal year one-time extra-ordinary items are identified and removed from the draft, and accommodates the effect of any new price, rate, fee, and salary changes. The resulting revised draft of the budget is presented to the City Council in their annual open meeting Budget Workshop. Any noted changes and the estimated cost for various projects proposed by City Council are then added to the latest budget draft thereby creating the proposed budget.

The City Mayor then submits the proposed budget for all funds to the City Council. The proposed budget with any changes is then approved by City Council. Budgets for all funds are adopted on a basis consistent with generally accepted accounting principles (GAAP).

All annual appropriations lapse at fiscal year-end.

E. Cash, cash equivalents and investments

The City's cash and cash equivalents are considered to be cash on hand, demand deposits and short-term investments with original maturities of three months or less from the date of acquisition.

F. Fair Value Measurements

The City complies with GASB Statement No. 72, Fair Value Measurement and Application, which defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction. Fair value accounting requires characterization of the inputs used to measure fair value into a three-level fair value hierarchy as follows:

- Level 1 inputs are based on unadjusted quoted market prices for identical assets or liabilities in an active market the entity has the ability to access
- Level 2 inputs are observable inputs that reflect the assumptions market participants would use
 in pricing the asset or liability developed based on market data obtained from sources
 independent from the entity
- Level 3 inputs are observable inputs that reflect the entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES – continued

There are three general valuation techniques that may be used to measure fair value:

- Market approach uses prices generated by market transactions involving identical or comparable assets or liabilities
- Cost approach uses the amount that currently would be required to replace the service capacity of an asset (replacement cost)
- Income approach uses valuation techniques to convert future amounts to present amounts based on current market expectations

G. Property taxes

Property taxes attach as an enforceable lien on property located in the City as of January 1. Taxes are levied on October 1 and are due and payable on or before January 31 of the following year. Washington County Appraisal District's office bills and Burton ISD collects the City's property taxes.

H. Restricted assets

Amounts in governmental funds which are legally identified for specific purposes either by City ordinance or contractual obligation are reflected as restricted assets.

I. Capital assets

Capital assets, which include property, plant, equipment, and infrastructure assets (e.g., roads, bridges, and similar items), are reported in applicable governmental or business-like activities columns in the government-wide financial statements. The City defines capital assets as assets with an estimated useful life in excess of two years. Such assets are recorded at historical cost or estimated historical cost if purchased or constructed. Donated capital assets are recorded at estimated fair market value at the time received.

The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend asset lives are not capitalized.

Capital assets are depreciated using the straight-line method over the following useful lives:

Assets	Years
Infrastructure	20-40 years
Buildings & Improvements	20-40 years
Machinery and equipment	10 years
Vehicles	5 years

J. Net Position/Fund Balances

Government-wide and proprietary fund net position is divided into three components:

Net investment in capital assets – consist of the historical cost of capital assets less
accumulated depreciation and less any debt that remains outstanding that was used to
finance those assets.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

- Restricted net position consist of net position that are restricted by the City's creditors, by the state enabling legislation, by grantors and by other contributors.
- Unrestricted net position all other net position are reported in this category. When both restricted and unrestricted resources are available for use it is the City's policy to use restricted resources first, then unrestricted resources as they are needed.

In the governmental fund financial statements, fund balances are classified as follows:

- Non-spendable Amounts that cannot be spent either because they are in a non-spendable form or because they are legally or contractually required to be maintained intact.
- Restricted Amounts that can be spent only for specific purposes because of the City Charter, the City Code, state or federal laws, or externally imposed conditions by grantors or creditors.
- Committed Amounts that can be used only for specific purposes determined by a formal action by City Council ordinance.
- Assigned Amounts that are designated by the Mayor for a particular purpose but are not spendable until a budget ordinance is passed or there is a majority vote approval (for capital projects or debt service) by City Council.
- Unassigned All amounts not included in other spendable classifications.

When an expense is incurred that can be paid using either restricted or unrestricted resources, the City's policy is to first apply the expense toward restricted resources and then toward unrestricted resources. In governmental funds, the City's policy is to first apply the expenditure toward restricted fund balance and then to other, less-restrictive classifications—committed and then assigned fund balances before using unassigned fund balances.

K. Interfund Activity

Interfund transactions are treated as transfers. Transfers between governmental or between proprietary funds are netted as part of the reconciliation to the government-wide financial statements.

L. <u>Use of Estimates</u>

The preparation of financial statements in conformity with generally accepted accounting principles (GAAP) in the United States of America requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results may differ from those estimates.

M. Deferred Outflows and Inflows of Resources

The City complies with GASB Statement No. 63, Financial Reporting of Deferred Outflows of Resources, Deferred inflows of resources and Net Position, which provides guidance for reporting the financial statement elements of deferred outflows of resources, which represent the consumption of the City's net position that is applicable to a future reporting period, and deferred inflows of resources, which represent the City's acquisition of net position applicable to a future reporting period.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

The City complies with GASB Statement No. 65, Items Previously Reported as Assets and Liabilities, which establishes accounting and financial reporting standards that reclassify, as deferred outflows of resources or deferred inflows of resources, certain items that were previously reported as assets and liabilities and recognizes, as outflows or resources or inflows of resources, certain items that were previously reported as assets and liabilities.

N. Risk Management

The City is exposed to various risks of losses related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The City purchases its insurance through Texas Municipal League intergovernmental Risk Pool (TMLRIP). As of March 31, 2022, no claims or losses have been incurred that were not covered by insurance. There is no liability due to any claim or suit having ever been filed.

O. Specific Deposit and Investment Risks

GASB Statement No. 40 requires a determination as to whether the City was exposed to the following specific investment risks and certain related disclosures:

Credit Risk. The risk that an issuer or other counterparty to an investment will not fulfill its obligations. The ratings of securities by nationally recognized rating agencies are designed to give an indication of credit risk. At year-end, the City was not exposed to credit risk.

Custodial Credit Risk. Custodial credit risk is the risk that in the event of a bank failure, the City's deposits may not be returned to it. Its deposits at year-end were fully covered by depository insurance or by pledged collateral held by the City's agent bank in the City's name. Therefore, at year-end, the City was not exposed to custodial credit risk.

Concentration of Credit Risk. The risk of loss attributed to the magnitude of a government's investment in a single issuer. At year-end, the City was not exposed to concentration of credit risk.

Interest Rate Risk. The risk that changes in interest rates will adversely affect the fair value of an investment. At year-end, the City was not exposed to interest rate risk.

Foreign Currency Risk. The risk that exchange rates will adversely affect the fair value of an investment. At year-end, the City was not exposed to foreign currency risk.

P. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the Fiduciary Net Position of the Texas Municipal Retirement System (TMRS) and additional to/deductions from TMRS's Fiduciary Net Position have been determined on the same basis as they are reported by TMRS. For this purpose, plan contributions are recognized in the period that compensation is reported for the employee, which is when contributions are legally due. Benefit payments and refunds are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - continued

Q. Recently Issued Accounting Pronouncements

In June 2017, the GASB issued GASB Statement No. 87, Leases, effective for fiscal years beginning after June 15, 2021. The objective of GASB Statement No. 87 is to improve accounting and financial reporting for leases by governments by required recognition of certain lease assets and liabilities that previously were classified as operating leases and recognized as inflows of resources or outflows of resources based on the payment provisions of the contract.

GASB Statement No. 87 establishes a single model for lease accounting based on the foundational principal that leases are financings of the right to use an underlying asset. Under GASB Statement No. 87, a lessee is required to recognize a lease liability and an intangible right-to-use asset, and a lessor is required to recognize a lease receivable and deferred inflow of resources. Management is evaluating the effects that the full implementation of GASB Statement No. 87 will have on its financial statements for the year ended March 31, 2023.

2. CASH

Deposits were with a contracted depository bank, Burton State Bank. As of year-end, deposits exceeded FDIC coverage and the City had adequate pledged collateral (Category 2). At March 31, 2022, the carrying amount of the City's deposits was \$287,899 (General and Debt Service Fund) and \$125,788 (Proprietary) the bank balance was \$281,455 (General and Debt Service Funds) and \$140,828 (Proprietary).

The collateral pledged is represented by specific identifiable investment securities and classified as to credit risk by the three categories described below:

- Category 1 Insured by FDIC or collateralized with securities held by the City or by its agent in its name.
- Category 2 Uninsured but collateralized with securities held by the pledging financial institution's trust department or agent in the City's name.

Category 3 - Uncollateralized.

	Carrying Value	Bank Balance
Category 1	\$250,000	\$250,000
Category 2	163,687	172,283
Category 3	-	-
	\$413,687	\$422,283

Restricted Cash. The City had received funds in the current and prior year which were restricted as listed below. The balances of the restricted assets at March 31, 2022, were as follows:

Governmental Funds	-Education	\$4,451
	-Municipal Court	5,008
	-Pavement	2,797
	-Security	297
	-Technology	3,798
	-Police & Road Repair	1,130
	-BOCC	10,495
	-Seized Money	<u>10,310</u>
	Total	\$38,286

2. CASH – continued

Investment Policy. The funds of the City must be deposited and invested under the terms of a contract, contents of which are set out in the Depository Contract Law. The depository bank places approved pledged securities for safekeeping and trust with the City's agent bank in an amount sufficient to protect City funds on a day-to-day basis during the period of the contract. The pledge of approved securities is waived only to the extent of the depository bank's dollar amount of Federal Deposit Insurance Corporation (FDIC) insurance.

The **Public Funds Investment Act** contains specific provisions in the areas of investment practices, management reports and establishment of appropriate policies. It requires the City to adopt, implement, and publicize an investment policy. The policy must address the following: (1) safety of principal and liquidity, (2) portfolio diversification, (3) allowable investments, (4) acceptable risk level, (5) expected rates of return, (6) maximum allowable stated maturity of portfolio investments, (7) maximum average dollar-weighted maturity allowed based on the stated maturity date for the portfolio, (8) investment staff quality and capabilities, (9) and bid solicitation preferences for certificates of deposit. Statues authorize the City to invest in (1) obligations of the U.S. Treasury, certain U.S. Agencies, and the State of Texas; (2) certificates of deposit, (3) certain municipal securities, (4) money market savings accounts, (5) repurchase agreements, (6) bankers acceptances, (7) mutual funds, (8) investment pools, (9) guaranteed investment contracts, (10) and common trust funds.

3. RECEIVABLES

6. PENSION PLAN

The City of Burton participates in the nontraditional, joint contributory, hybrid defined benefit pension plan administered by the Texas Municipal Retirement System (TMRS). TMRS is an agency created by the State of Texas and administered in accordance with the TMRS Act, Subtitle G, Title 8, Texas Governments Code (the TMRS Act) as an agent multiple-employer retirement system for municipal employees in the State of Texas. The TMRS Act places the general administration and management of the System with a six-member Board of Trustees. Although the Governor, with the advice and consent of the Senate, appoints the Board, TMRS is not fiscally dependent on the State of Texas. TMRS's defined benefit pension plan is a tax-qualified plan under Section 401 (a) of the Internal Revenue Code. TRMS issues a publicly available comprehensive annual financial report (CAFR) that can be obtained at www.tmrs.com.

In the prior year, the City elected to no longer participate in the pension plan for current or future employees. The existing pension liability will continue to be funded by future actuarial valuations.

The amount included in payroll expenditures is \$279.

7. MANAGEMENT EVALUATION

Management has evaluated subsequent events through the date of this report, the date of which the financial statements were available to be issued.

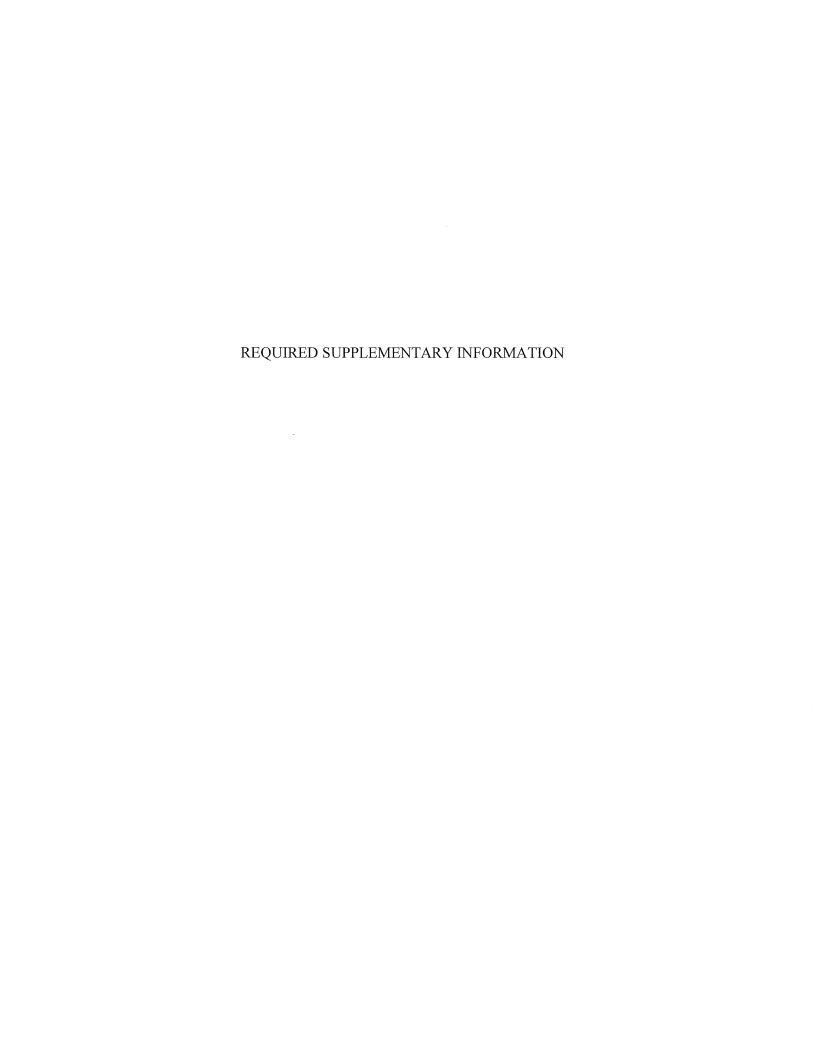

8. SUBSEQUENT EVENT

COVID-19

The Coronavirus (COVID-19) pandemic impacted the nation, leading to consumer uncertainties and financial setbacks for many businesses and individuals. COVID-19 may have a continued material adverse impact on economic and market conditions, triggering a period of global economic slowdown. Management continues to monitor and evaluate the continually evolving environment associated with the virus. While it is not possible at this time to estimate the impact that COVID-19 will have on the District's operations, the pandemic could adversely affect the District's financial position and activities.

GRANTS

The City applied for and was awarded a \$72,352 grant from the Texas Department of Emergency Management (TDEM) to be used for Water & Sewer Infrastructure Investments or Improvements. As of March 31, 2022, the City has received \$36,177, and is expecting to receive the remaining funds before the end of 2022.
